

HON. RICHARD A. JONES

UNITED STATES DISTRICT COURT  
WESTERN DISTRICT OF WASHINGTON  
AT SEATTLE

PUGET SOUNDKEEPER ALLIANCE,	)	
	)	Case No. 14-cv-00803-RAJ
Plaintiff,	)	
	)	CONSENT DECREE
v.	)	
	)	
LOUIS DREYFUS COMMODITIES LLC;	)	
LOUIS DREYFUS COMMODITIES NA	)	
LLC; LOUIS DREYFUS LLC; LDC	)	
WASHINGTON LLC; LD	)	
COMMODITIES SEATTLE EXPORT	)	
ELEVATOR LLC,	)	
	)	
Defendants.	)	
	)	

WHEREAS, Plaintiff PUGET SOUNDKEEPER ALLIANCE (“Soundkeeper” or “Plaintiff”) filed a Second Amended Complaint against Defendants LOUIS DREYFUS COMMODITIES LLC, LOUIS DREYFUS COMMODITIES NA LLC, LOUIS DREYFUS LLC, LDC WASHINGTON LLC, and LD COMMODITIES SEATTLE EXPORT ELEVATOR LLC (collectively referred to herein as “Defendants”)<sup>1</sup> alleging violations of the Clean Water

<sup>1</sup> In March 2016, Louis Dreyfus LLC changed its name to Louis Dreyfus US LLC; LDC Commodities Seattle Export Elevator LLC changed its name to Louis Dreyfus Company Seattle Export Elevator LLC; LDC Washington LLC changed its name to Louis Dreyfus Company Washington LLC; Louis Dreyfus Commodities LLC changed its name to Louis Dreyfus Company LLC; and Louis Dreyfus Commodities NA LLC changed its name to Louis Dreyfus Company NA LLC. Except for Louis Dreyfus Company Washington LLC, where referred to individually in this Consent Decree, these companies are referred to by their former names.

1 Act, 33 U.S.C. § 1251 *et seq.*, relating to discharges of grain, grain dust, wash water and  
2 stormwater from Defendants' grain elevator and export facility located at Pier 86 in Seattle,  
3 Washington (hereafter the "Facility"), seeking declaratory and injunctive relief, civil penalties  
4 and attorney's fees and costs;

5 WHEREAS, counsel and representatives for the parties to this action have engaged in  
6 discussions relating to the potential settlement of this litigation;

7 WHEREAS, Plaintiff and Defendants agree that settlement of these matters is in the best  
8 interest of the parties and the public, and that entry of this Consent Decree without additional  
9 litigation is the most appropriate means of resolving this action; and  
10

11 WHEREAS, Plaintiff and Defendants, by their authorized counsel and without trial or  
12 final adjudication of the issues of fact or law with respect to Plaintiff's claims or allegations that  
13 remain undecided, consent to the entry of this Consent Decree in order to avoid the risks of  
14 litigation and to resolve the controversy between them;  
15

16 NOW, THEREFORE, without trial of any issue of fact or law, and upon consent of the  
17 parties, and upon consideration of the mutual promises herein contained, it is hereby  
18

19 ORDERED, ADJUDGED AND DECREED as follows:

20 1. This Court has jurisdiction over the parties and subject matter of this action for  
21 purposes of this Consent Decree.  
22

23 2. The undersigned representative for each party certifies that he or she is fully  
24 authorized by the party or parties whom he or she represents to enter into the terms and  
25 conditions of this Consent Decree and to legally bind the party or parties, their successors in  
26 interest and assigns of the parties to it.  
27

28 3. This Consent Decree shall apply to, and be binding upon, the parties, and upon  
29

1 the successors in interest and assigns of the parties.

2 4. This Consent Decree shall apply to operation by the lessee and/or oversight of the  
3 Facility located at or about Pier 86, 955 Alaskan Way W, Seattle, WA 98119 and to Louis  
4 Dreyfus Company Washington LLC in its role as lessee.

5 5. This Consent Decree constitutes a full and complete settlement of the claims  
6 alleged in the Second Amended Complaint and all other claims, known and unknown, existing as  
7 of the date of entry of this Consent Decree, that could be asserted under the Clean Water Act, 33  
8 U.S.C. §§ 1251-1387, arising from operations of the Facility identified in paragraph 4 of this  
9 Consent Decree.  
10

11 6. This Consent Decree shall not constitute evidence in any proceeding, an  
12 admission or adjudication with respect to any allegation of the Second Amended Complaint, any  
13 fact or conclusion of law with respect to any matter alleged in or arising out of the Second  
14 Amended Complaint, or the admission or evidence of any wrongdoing or misconduct on the part  
15 of the Defendants, its successor or assigns.  
16

17 7. The parties agree that the obligations undertaken under Paragraphs 8, 9, and 10  
18 are in full and complete satisfaction of the claims covered by the Second Amended Complaint  
19 and all other claims covered by this Consent Decree, as described in Paragraph 5.  
20

21 8. Injunctive Relief:

22 a. Louis Dreyfus Company Washington LLC will comply fully with the  
23 terms and provision of the Industrial Stormwater General Permit at the facility and any  
24 successor, modified, or replacement permit.  
25

26 b. By September 30, 2017, Louis Dreyfus Company Washington LLC must  
27 modify the access pier and shipping pier to collect, manage, and convey all stormwater from its  
28

1 surface to an upland area of the facility for infiltration in accordance with the design submitted to  
2 Ecology, unless infiltration is technologically infeasible, is disapproved by Ecology or if the soil  
3 contamination investigation detailed below identifies contaminated soils at the selected  
4 infiltration area. By this date, Louis Dreyfus Company Washington LLC must also prepare the  
5 upland infiltration site to ensure, consistent with the Stormwater Management Manual for  
6 Western Washington, it is capable of infiltrating the two piers' stormwater, in addition to any  
7 other stormwater falling in the site's upland drainage area. Before commencing any infiltration  
8 site work, Louis Dreyfus Company Washington LLC must investigate whether hydraulic or other  
9 oils released in the rail yard have affected soil and/or groundwater in the infiltration area at  
10 concentrations exceeding regulatory criteria, produce a written report documenting the  
11 investigation and its results, and immediately provide a copy to Soundkeeper. If contaminated  
12 soils or groundwater are found at levels exceeding applicable criteria in the infiltration area, if  
13 infiltration of stormwater from the piers is technologically infeasible, or if infiltration is  
14 disapproved by Ecology, Louis Dreyfus Company Washington LLC will convey the piers'  
15 stormwater to sanitary sewer. These pier modifications will include an impervious curb or other  
16 permanent barrier around the perimeter of the piers to capture stormwater and spilled grain on  
17 the pier.  
18  
19  
20  
21

22 c. Until the pier modifications described above are complete, Louis Dreyfus  
23 Company Washington LLC must use a vacuum sweeper, capable of picking up particles down to  
24 the 10 micrometer size, on the piers by the next working day shift following the completion of  
25 loading of each vessel. After the pier modifications described above are complete, Louis  
26 Dreyfus Company Washington LLC will clean up grain spilled onto the pier if, in its judgment,  
27 such action is needed to prevent wind from blowing grain into Elliott Bay.  
28  
29

1                   d. Louis Dreyfus Company Washington LLC will modify the grain  
2 conveyance system and operating procedures at Pier 86 to prevent discharges of grain to Elliott  
3 Bay as specified below. If these modifications are insufficient to prevent discharges of grain  
4 from Pier 86 to Elliott Bay, Louis Dreyfus Company Washington LLC will evaluate whether  
5 additional modifications are necessary and if, in its judgment, they are, will undertake such  
6 modifications. If the modifications require engineering, Louis Dreyfus Company Washington  
7 LLC will undertake such modifications in consultation with River Consulting or another  
8 qualified engineer.:

9  
10                   i. Within 30 days after entry of the Consent Decree, Louis Dreyfus  
11 Company Washington LLC will install one diagonal rubber belt plow on each of the return belts  
12 of Conveyors 14 and 15 between the shipping gallery and Tower 6. In addition, a limit switch  
13 will be installed next to each diagonal rubber belt plow approximately 1½ inches above the  
14 return belt and programmed to shut off the belt if contact with grain or other solid material on the  
15 belt triggers the actuator on the limit switch. In the event a limit switch is activated and a  
16 conveyor belt is shut off, Louis Dreyfus Company Washington LLC will visually inspect the  
17 belt(s) and remove any grain or grain dust that, in its judgment, could fall out of the grain  
18 conveyance system when the belt is restarted.

19  
20                   ii. Within 60 days after entry of the Consent Decree, Louis Dreyfus  
21 Company Washington LLC will inspect the floor under and walls surrounding Conveyors 14, 15,  
22 16, and 17, beginning at the point where Conveyors 14 and 15 pass over the gate between  
23 Centennial Park and the access pier, and continuing through to the southern end of the shipping  
24 gallery. Louis Dreyfus Company Washington LLC will (1) fill any openings in the concrete  
25 floor under the conveyor system that are ¼-inch or larger in diameter, except for any opening  
26  
27  
28  
29

1 that is part of the original or modified design or construction of the facility, such as the take-up at  
2 Tower 6; (2) close any gaps of 1/4-inch or more between the metal siding of the housing and the  
3 concrete floor under the conveyor system; and (3) cover with steel plating the expansion joint at  
4 the shoreline support tower for the transfer gallery. Louis Dreyfus Company Washington LLC  
5 will repeat this process quarterly.  
6

7                   iii. Within 90 days after entry of the Consent Decree, Louis Dreyfus  
8 Company Washington LLC will install limit switches at the pivot point on each of the five  
9 loading spouts at the grain terminal. The limit switches on each of the five loading spouts will  
10 be programmed to shut off conveyor belts delivering grain to the loading spout on which the  
11 limit switches are installed when the angle of the spout is less than 35 degrees from horizontal.  
12 In addition, Louis Dreyfus Company Washington LLC will install a limit switch on the loading  
13 spout on Tower 1 that is programmed to prevent movement of the end of the spout during vessel  
14 loading over the area within the angle formed by the intersection of two lines. The first line is  
15 defined by two points: (1) the pivot point of the loading spout on Tower 1, and (2) the point at  
16 which the loading spout on Tower 1 would, when moved while fully extended, cross a line  
17 running parallel to the western edge of the shipping pier and commencing at the intersection of  
18 the shipping pier and the access pier. The second line runs parallel to the western edge of the  
19 access pier, commencing at the intersection of the shipping pier and the access pier. Louis  
20 Dreyfus Company Washington LLC also will install a limit switch on the loading spout on  
21 Tower 5 that is programmed to prevent movement of the end of the spout during vessel loading  
22 over the area within the angle formed by the intersection of two lines. The first line is defined by  
23 two points: (1) the pivot point of the loading spout on Tower 5, and (2) the point at which the  
24 loading spout on Tower 5 would, when moved while fully extended, cross a line running parallel  
25  
26  
27  
28  
29

1 to the western edge of the shipping pier and commencing at the intersection of the shipping pier  
2 and the access pier. The second line runs parallel to the southern finger pier, commencing at the  
3 intersection of the shipping pier and the southern finger pier. Louis Dreyfus Company  
4 Washington LLC may manually override the limit switches, on a case by case basis, when it is  
5 necessary for purposes of maintenance or uncommon operational circumstances. In the event a  
6 limit switch is activated and a conveyor belt is shut off, Louis Dreyfus Company Washington  
7 LLC will not restart the corresponding conveyor belt(s) if the loading spout(s) are not over a  
8 vessel.  
9

10  
11 iv. Within six months after the Corps of Engineers issues a permit  
12 authorizing such work, Louis Dreyfus Company Washington LLC will cover the grating on the  
13 west side of the shipping pier with a solid surface. The solid surface will extend a minimum of  
14 two inches onto the existing solid surface on the shipping pier and will be sloped to promote  
15 drainage toward the eastern edge of the shipping pier. Louis Dreyfus Company Washington  
16 LLC will, within 30 days after entry of the Consent Decree, apply for permits and other  
17 necessary approvals for this work. Louis Dreyfus Company Washington LLC will act diligently  
18 and in good faith to secure the necessary permits for this work, and promptly respond to any  
19 concerns raised by a permitting authority. Louis Dreyfus Company Washington LLC will  
20 promptly provide copies of all permit application documents as filed and correspondence with  
21 permitting authorities to Soundkeeper.  
22

23  
24 v. Within six (6) months of completion of the work described in  
25 paragraph 8(d), *et seq.*, Louis Dreyfus Company Washington LLC will permit a representative of  
26 Plaintiff onto the Facility to observe the implemented modifications. Louis Dreyfus Company  
27 Washington LLC will provide a demonstration for Soundkeeper of each limit switch and rubber  
28  
29

1 belt plow functioning. Louis Dreyfus Company Washington LLC will pay \$2,000 to Smith &  
2 Lowney PLLC's trust account for this process. This visit will be coordinated in advance with  
3 Louis Dreyfus Company Washington LLC's counsel of record. For the purposes of this  
4 coordination, Plaintiff will contact Stephen Tan either by email at [stan@cascadialaw.com](mailto:stan@cascadialaw.com) or by  
5 phone at 206-292-2657. Louis Dreyfus Company Washington LLC agrees to accommodate  
6 Plaintiff's proposal for the time of this visit where reasonable. Soundkeeper's representative  
7 must comply with applicable Visitor Policies while at the Facility.  
8

9 e. Unless Louis Dreyfus Company Washington LLC decides not to infiltrate  
10 for any of the reasons stated in Paragraph 8(b), Louis Dreyfus Company Washington LLC will  
11 demonstrate to Soundkeeper that the drainage basins that drain to Catch Basin 2 and Catch Basin  
12 3 infiltrate runoff at the rate of the design storm specified in the Stormwater Management  
13 Manual for Western Washington. If Louis Dreyfus Company Washington LLC is unable to  
14 make this demonstration, it will further reduce the potential for discharge as necessary so that  
15 both drainage basins meet this standard. If Louis Dreyfus Company Washington LLC installs an  
16 Underground Injection Control well to enhance infiltration, it will comply with applicable  
17 requirements of WAC 173-218.  
18

19 f. Louis Dreyfus Company Washington LLC must inform all employees,  
20 contractors, and stevedores with any role on the piers about the prohibition on washing, pushing,  
21 or discarding grain and grain dust into Elliott Bay and the consequences for violating it before  
22 they begin work on the piers. Louis Dreyfus Company Washington LLC will immediately order  
23 work stopped if discharges of grain are observed, either in-person or on security cameras.  
24

25 g. Louis Dreyfus Company Washington LLC must develop and implement a  
26 "bird control plan" in consultation with a qualified consultant that identifies additional methods  
27  
28  
29

1 to prevent birds from feeding/nesting/roosting on the piers and to prevent bacterial contamination  
2 from bird waste. Louis Dreyfus Company Washington LLC will incorporate the contents of the  
3 bird control plan into the facility's SWPPP.

4 h. Louis Dreyfus Company Washington LLC must develop and implement a  
5 "grain spill prevention plan" in consultation with its consultant, Maul Foster Alongi, that  
6 identifies additional methods to prevent grain or grain dust spills at the Facility and to prevent  
7 grain or grain dust from reaching Elliott Bay from any part of the Facility. Louis Dreyfus  
8 Company Washington LLC will incorporate the contents of the grain spill prevention plan into  
9 the facility's SWPPP.  
10

11 i. Within 60 days of entry of the consent decree, Louis Dreyfus Company  
12 Washington LLC must provide Soundkeeper with a copy of its updated SWPPP, "grain spill  
13 prevention plan" and "bird control plan" (collectively "the plans").  
14

15 i. Soundkeeper and its own consultant will have 30 days from receipt  
16 of the updated SWPPP and the plans to review and comment on the facility's latest SWPPP and  
17 the other plans ("comment period"). Soundkeeper's comment period may be extended by mutual  
18 agreement, and Louis Dreyfus Company Washington LLC will agree to any reasonable request  
19 for an extension, including but not limited to a request due to the unavailability of Soundkeeper's  
20 consultant. Louis Dreyfus Company Washington LLC must pay for Soundkeeper's consultant  
21 fees in the amount of \$3,000 for this process.  
22

23 ii. If Soundkeeper's consultant identifies reasonable and effective  
24 improvements to the plans, Louis Dreyfus Company Washington LLC will consider these  
25 improvements for possible implementation at the facility, and provide a written response to  
26 Soundkeeper's consultant's suggested improvements no later than thirty days after receipt. If  
27  
28  
29

1 Louis Dreyfus Company Washington LLC does not agree that the suggested improvements  
2 should be implemented, Louis Dreyfus Company Washington LLC's response shall describe the  
3 reasons for its decision.

4                   iii. Louis Dreyfus Company Washington LLC will incorporate the  
5 contents of the bird control plan and grain spill prevention plan into the facility's SWPPP. The  
6 excerpts from Section 8 of this consent decree attached hereto as **Attachment B** shall be made  
7 an appendix to the facility's SWPPP. In addition, Louis Dreyfus Company Washington LLC  
8 will incorporate the provisions of **Attachment C** into the facility's SWPPP following completion  
9 of the triggering events specified in that attachment.  
10

11                   j. For a period of three years, Louis Dreyfus Company Washington LLC will  
12 forward to Soundkeeper copies of all communications to or from the Department of Ecology  
13 related to its ISGP coverage, stormwater discharges from the facility, or illicit/unpermitted  
14 discharges from the facility.  
15

16                   k. Plaintiff acknowledges that the work required by this Paragraph 8 may be  
17 subject to local, state, and federal permitting requirements. Plaintiff also acknowledges that  
18 facility modifications are subject to approval from the Port of Seattle (the "lessor"), which owns  
19 Pier 86.  
20

21                   9. Payment in Lieu of Penalty: Within seven (7) days of entry of this Consent  
22 Decree by the Court, Louis Dreyfus Company Washington LLC shall make a payment in the  
23 amount of Six Hundred and Ninety-Nine Thousand Dollars (\$699,000) to the Rose Foundation  
24 for Communities and the Environment – Puget Sound Stewardship and Mitigation Fund ("Rose  
25 Foundation"), as described in **Attachment A** to this Consent Decree. Checks will be made to the  
26 order of and delivered to: The Rose Foundation, 1970 Broadway, Suite 600, Oakland, CA 94612.  
27  
28  
29

1 Payment will include the following reference in a cover letter or on the check: "Consent Decree,  
2 Puget Soundkeeper Alliance v. Louis Dreyfus, Clean Water Act Settlement." Defendants agree  
3 to provide a copy of the check and cover letter, if any, to Plaintiff.

4       10. Costs of Litigation. Within seven (7) days of entry of this Consent Decree, Louis  
5 Dreyfus Company Washington LLC shall pay Plaintiff's actual litigation fees, expenses and  
6 costs (including reasonable attorney and expert witness fees) incurred in this matter in the  
7 amount of Four Hundred and Three Thousand Dollars (\$403,000), of which Five Thousand  
8 Dollars (\$5,000) of that amount is for full and complete satisfaction of payment pursuant to  
9 paragraph 8(d)(v) and 8(i)(i) of this Consent Decree. Checks will be made to the order of and  
10 mailed to Smith & Lowney, PLLC, 2317 East John St., Seattle, WA 98112, Attn: Knoll  
11 Lowney. Defendants' payments shall be in full and complete satisfaction of any claims Plaintiff  
12 has or may, either legal or equitable, and of any kind or nature whatsoever, for fees, expenses,  
13 and costs incurred in this litigation. As a condition precedent of the payment required under this  
14 paragraph, Plaintiff's counsel will provide a sworn affidavit that their contemporaneous time  
15 records of fees and costs exceed the \$398,000.

16       11. A "force majeure" event is any event outside the reasonable control of Defendants  
17 that prevents or causes a delay in performing tasks required by this decree that cannot be cured  
18 by due diligence. Prevention or delay in performance of a task required by this decree caused by  
19 a force majeure event is not a failure to comply with the terms of this decree, provided that (a)  
20 Louis Dreyfus Company Washington LLC notifies Plaintiff of the event, the steps that Louis  
21 Dreyfus Company Washington LLC will take to perform the task, the projected time that will be  
22 needed to complete the task, and the measures that have been taken or will be taken to prevent or  
23 minimize any impacts to stormwater quality resulting from delay in completing the task; or (b), if  
24

1 the force majeure event is delay in issuance of a permit or other approval from any local, state, or  
2 federal government, the lessor at Pier 86, or any other person that is necessary to complete work  
3 described in Paragraph 8, Louis Dreyfus Company Washington LLC notifies Plaintiff of the  
4 event and provides any available information regarding when the permit or other approval may  
5 be issued; or (c) if the force majeure event is denial of a permit or other approval from any local,  
6 state, or federal government, the lessor at Pier 86, or any other person that is necessary to  
7 complete work described in Paragraph 8, Louis Dreyfus Company Washington LLC notifies  
8 Plaintiff of the event and engages with Plaintiff in good-faith negotiations to address the denial.  
9  
10 If a force majeure event prevents implementation of any of the injunctive relief identified above,  
11 Louis Dreyfus Company Washington LLC and Soundkeeper will negotiate in good faith to agree  
12 to an alternative action with the same goal and effect of the action prevented by the force  
13 majeure event.  
14

15 Louis Dreyfus Company Washington LLC will notify Plaintiff of the occurrence of a  
16 force majeure event as soon as reasonably possible but, in any case, no later than fifteen (15)  
17 days after the occurrence of the event. In such event, the time for performance of the task will be  
18 extended for a reasonable period of time following the force majeure event.  
19

20 By way of example and not limitation, force majeure events include:

- 21 a) Acts of God, war, insurrection, or civil disturbance;  
22 b) Earthquakes, landslides, fire, floods;  
23 c) Actions or inactions of third parties, including permitting authorities or the  
24 lessor at Pier 86, over which Defendants have no control;  
25 d) Unusually adverse weather conditions;  
26 e) Restraint by court order or order of public authority;  
27  
28  
29

1 f) Strikes; and

2 g) Litigation, arbitration, or mediation that causes delay.

3 12. The Court shall retain jurisdiction over this matter and allow this case to be  
4 reopened without filing fee for the purpose of enabling the parties to apply to the Court for any  
5 further order that may be necessary to construe, carry out, enforce compliance, and/or resolve  
6 any dispute regarding the terms or conditions of this Consent Decree until termination of the  
7 Consent Decree pursuant to paragraph 14. In the event of a dispute regarding implementation of,  
8 or compliance with, this Consent Decree, the parties shall first attempt to informally resolve the  
9 dispute through meetings between the parties by serving written notice of dispute and request for  
10 resolution to the parties and their counsel of record. If no resolution is reached within ninety  
11 (90) days from the date that the notice of dispute is served, the parties may resolve the dispute by  
12 filing motions with the Court.  
13

14  
15 13. The parties recognize that no consent judgment can be entered in a Clean Water  
16 Act suit in which the United States is not a party prior to forty-five (45) days following the  
17 receipt of a copy of the proposed consent judgment by the United States Attorney General and  
18 the Administrator of the United States Environmental Protection Agency pursuant to 33 U.S.C. §  
19 1365(c)(3). Therefore, upon the signing of this Consent Decree by the parties, Plaintiff shall  
20 serve copies of it upon the Administrator of the United States Environmental Protection Agency  
21 and the United States Attorney General.  
22

23  
24 14. This Consent Decree shall take effect on the date it is entered by the Court. This  
25 Consent Decree shall terminate three (3) years following entry of the Consent Decree.  
26

27 15. This Consent Decree may be modified only upon the written consent of the  
28 parties and the approval of the Court.  
29

1           16. If for any reason the Court should decline to approve this Consent Decree in the  
2 form presented, the parties agree to continue negotiations in good faith in an attempt to cure any  
3 objection raised by the Court to entry of this Consent Decree.

4           17. All communications between the parties shall be through legal counsel.  
5 Notifications or copies required by this Consent Decree to be made to Plaintiff shall be delivered  
6 electronically to:  
7

25           E-mail: stan@cascadialaw.com

26           18. The parties agree that the Confidentiality Agreement between the parties dated  
27 September 17, 2015 shall apply to any Confidential Information (as that term is defined in the  
28 Confidentiality Agreement) provided to Plaintiff pursuant to this Consent Decree, and so  
29 designated.

Re: Puget Soundkeeper Alliance v. Louis Dreyfus Commodities et al (14-cv-00803-RAJ)

Dear Mr. Swegle,

This letter is intended to provide assurance that I have received the proposed Consent Decree between Puget Soundkeeper Alliance and Louis Dreyfus Commodities et al and that I am authorized by my Board of Directors to make the following binding commitments on behalf of the Rose Foundation.

- 1) I understand that the Rose Foundation should receive funds from Louis Dreyfus Commodities et al as specified in the Consent Decree.
- 2) The Rose Foundation shall only use these Louis Dreyfus Commodities et al funds to improve or protect the water quality of Puget Sound, and shall disperse them through the Rose Foundation's Puget Sound Stewardship & Mitigation Fund, a grantmaking fund, which is wholly dedicated to supporting projects that benefit the water quality of Puget Sound. Since the location of the Louis Dreyfus Commodities facility is in Elliott Bay in Central Puget Sound, the Rose Foundation shall target the funds towards projects benefitting the water quality of Elliott Bay, Central Puget Sound and associated watersheds.
- 3) After the funds have been disbursed, the Rose Foundation shall send a report to the Justice Department, the Court and the Parties describing how the funds were utilized and demonstrating conformance with the nexus of the Consent Decree.

**Rose Foundation for Communities and the Environment**

The Rose Foundation is a 501(c)(3) public charity (tax ID#94-3179772). Its mission is to support grassroots initiatives to inspire community action to protect the environment, consumers and public health. To fulfill this mission, the Rose Foundation conducts the following activities:

- Raise money to award as grants to qualified non-profit organizations conducting charitable operations. The Rose Foundation does not support lobbying activities that are prohibited by Section 501(c)(3) of the IRS Code, and no portion of the Louis Dreyfus Commodities et al funds shall be used to support any political lobbying activities whatsoever.

- Work directly in schools and in the community to encourage environmental stewardship and civic participation.
- Help government efforts to control pollution and protect the environment by encouraging community engagement in local, state and federal research and policy development.

Within this broad range of activities, all of the Rose Foundation's work revolves around one or more of the following strategic themes:

- Build and maintain a bridge between the community and organized philanthropy.
- Protect the natural environment, public health, and community and consumer rights.
- Promote collaboration between labor, environmental, business, consumer and social interests.
- Cultivate a new generation of environmental stewards and social policy leaders.
- Respect the inalienable rights protected by our nation's constitution, and the essential human rights to clean air, clean water, and individual dignity and privacy.

The Rose Foundation is governed by a Board of Directors. Grant applicants are required to submit written proposals, which must include, at a minimum, specific information about the goals, activities and projected outcomes of the proposed project, background about the charitable applicant, budget information, and a specific funding request. The Foundation may require additional information in order to fully evaluate the application. Applications are first screened by Foundation staff. Staff then makes recommendations to the Foundation Board for action. The Foundation requires all projects to submit written reports within one year of receipt of the grant award describing work conducted under the grant, thereby providing an accountability mechanism over funds awarded. Annual audits by the certified public accounting firm Levy and Powers are posted on the Foundation's website [www.rosefdn.org](http://www.rosefdn.org).

I hope this provides you with the information you require. Please do not hesitate to contact me with any questions, or for additional information at (510) 658-0702 or [tlittle@rosefdn.org](mailto:tlittle@rosefdn.org).

Sincerely,

Tim Little, Executive Director

1. Until the the access pier and shipping pier have been modified to collect, manage, and convey all stormwater from its surface to an upland area of the facility, Louis Dreyfus Company Washington LLC must use a vacuum sweeper, capable of picking up particles down to the 10 micrometer size, on the piers by the next working day shift following the completion of loading of each vessel. After the pier modifications described above are complete, Louis Dreyfus Company Washington LLC will clean up grain spilled onto the pier if, in its judgment, such action is needed to prevent wind from blowing grain into Elliott Bay.
2. Before infiltrating stormwater collected from the access pier and shipping pier, Louis Dreyfus Company Washington LLC will determine that the drainage basins that drain to Catch Basin 2 and Catch Basin 3 infiltrate runoff at the rate of the design storm specified in the Stormwater Management Manual for Western Washington. If Louis Dreyfus Company Washington LLC is unable to make this determination, it will further reduce the potential for discharge as necessary so that both drainage basins meet this standard. If Louis Dreyfus Company Washington LLC installs an Underground Injection Control well to enhance infiltration, it will comply with applicable requirements of WAC 173-218.
3. Louis Dreyfus Company Washington LLC must inform all employees, contractors, and stevedores with any role on the piers about the prohibition on washing, pushing, or discarding grain and grain dust into Elliott Bay and the consequences for violating it before they begin work on the piers. Louis Dreyfus Company Washington LLC will immediately order work stopped if discharges of grain are observed, either in-person or on security cameras.

## ATTACHMENT C

Louis Dreyfus Company Washington LLC will incorporate the following provisions into the grain terminal's SWPPP after the triggering event specified for each such provision:

1. **Triggering event: Modification of access pier and shipping pier to collect, manage, and convey all stormwater from its surface to an upland area of the facility for infiltration in accordance with the design submitted to Ecology, unless infiltration is technologically infeasible, is disapproved by Ecology or if the soil contamination investigation detailed below identifies contaminated soils at the selected infiltration area.**

Provision to be incorporated into SWPPP: Before infiltrating stormwater collected from the access pier and shipping pier, Louis Dreyfus Company Washington LLC must prepare the upland infiltration site to ensure, consistent with the Stormwater Management Manual for Western Washington, it is capable of infiltrating the two piers' stormwater, in addition to any other stormwater falling in the site's upland drainage area. Before commencing any infiltration site work, Louis Dreyfus Company Washington LLC must investigate whether hydraulic or other oils released in the rail yard have affected soil and/or groundwater in the infiltration area at concentrations exceeding regulatory criteria. If contaminated soils or groundwater are found at levels exceeding applicable criteria in the infiltration area, if infiltration of stormwater from the piers is technologically infeasible, or if infiltration is disapproved by Ecology, Louis Dreyfus Company Washington LLC will convey the piers' stormwater to sanitary sewer. These pier modifications will include an impervious curb or other permanent barrier around the perimeter of the piers to capture stormwater and spilled grain on the pier.

2. **Triggering event: Installation of one diagonal rubber belt plow on each of the return belts of Conveyors 14 and 15 between the shipping gallery and Tower 6, and installation of a limit switch next to each diagonal rubber belt plow approximately 1½ inches above the return belt.**

1        Provision to be incorporated into SWPPP (“Conveyors 14 and 15 Modifications”): The  
2 limit switch installed next to the diagonal rubber belt plow on each of the return belts of  
3 Conveyors 14 and 15 between the shipping gallery and Tower 6 will be programmed to shut off  
4 the belt if contact with grain or other solid material on the belt triggers the actuator on the limit  
5 switch. In the event a limit switch is activated and a conveyor belt is shut off, Louis Dreyfus  
6 Company Washington LLC will visually inspect the belt(s) and remove any grain or grain dust  
7 that, in its judgment, could fall out of the grain conveyance system when the belt is restarted.  
8

9            **3.        Triggering event: Initial completion of process described below.**

10        Provision to be incorporated into SWPPP (“Quarterly Inspections”): Louis Dreyfus  
11 Company Washington LLC will inspect the floor under and walls surrounding Conveyors 14, 15,  
12 16, and 17, beginning at the point where Conveyors 14 and 15 pass over the gate between  
13 Centennial Park and the access pier, and continuing through to the southern end of the shipping  
14 gallery. Louis Dreyfus Company Washington LLC will (1) fill any openings in the concrete  
15 floor under the conveyor system that are ¼-inch or larger in diameter, except for any opening  
16 that is part of the original or modified design or construction of the facility, such as the take-up at  
17 Tower 6; (2) close any gaps of ¼-inch or more between the metal siding of the housing and the  
18 concrete floor under the conveyor system; and (3) cover with steel plating the expansion joint at  
19 the shoreline support tower for the transfer gallery. Louis Dreyfus Company Washington LLC  
20 will repeat this process quarterly.  
21  
22  
23

24            **4.        Triggering event: Installation of limit switches at the pivot point on each of**  
25            **the five loading spouts at the grain terminal.**

26        Provision to be incorporated into SWPPP (“Pivot Point Limit Switches”): The limit  
27 switches on each of the five loading spouts will be programmed to shut off conveyor belts  
28 delivering grain to the loading spout on which the limit switches are installed when the angle of  
29

1 the spout is less than 35 degrees from horizontal. In the event a limit switch is activated and a  
2 conveyor belt is shut off, Louis Dreyfus Company Washington LLC will not restart the  
3 corresponding conveyor belt(s) if the loading spout(s) are not over a vessel.

4 **5. Triggering event: Installation of solid surface to cover grating on the west**  
5 **side of the shipping pier.**

6 Provision to be incorporated into SWPPP ("Grating Cover"): The solid surface covering  
7 the grating on the west side of the shipping pier will extend a minimum of two inches onto the  
8 existing solid surface on the shipping pier and will be sloped to promote drainage toward the  
9 eastern edge of the shipping pier.  
10

11 **6. Triggering event: Completion of the triggering events in 2 through 5 above.**  
12

13 Provision to be incorporated into SWPPP: If the Conveyor 14 and 15 Modifications, the  
14 Quarterly Inspections, the Pivot Point Limit Switches, and the Grating Cover are insufficient to  
15 prevent discharges of grain from Pier 86 to Elliott Bay, Louis Dreyfus Company Washington  
16 LLC will evaluate whether additional modifications are necessary and if, in its judgment, they  
17 are, will undertake such modifications. If the modifications require engineering, Louis Dreyfus  
18 Company Washington LLC will undertake such modifications in consultation with River  
19 Consulting or another qualified engineer.
